Rated - Type DGL2W, Sheathing - Type DGL2W, Soffit - Type DGLW, Type LW2X, Veneer Plaster Base - Type LW2X. 

Proprietary channel shaped studs, minimum 3-5/8 in. wide, Studs to be cut 1/2 in. less than the assembly thickness.

Spray applied cellulose material. The fiber is applied with water to completely fill the enclosed cavity in the wall.

FSW-6, FSW-8, FSMR-C.

Gypsum Board attached to furring channels as described in Item 4. Side joint furring channels shall be overlapped 6 in. and tied together with double strand of No. 18 SWG galv steel wire spaced a max 12 in. along the top and bottom edges of the wall.

Hornet 12 steel screws gypsum panel steel screws spaced 8 in. OC at perimeter and 12 in. OC in the field. Lead discs, nominal 3/8 in. diam spaced a max 48 in. along the top and bottom edges of the wall.

FSR-600, FSR-600C (2.75) clip for use with 2-23/32 in. wide furring channels.

Steel Framing Members (Steel Studs - 6 in. or less in thickness): I. Centered over studs and staggered one stud width. Exterior walls - Items 2A & 2B, Interior walls - 90° in from edge of wall and spaced 36 in. O.C. at perimeter and 48 in. O.C. in field.

Steel Framing Members (Steel Studs - 6 in. or less in thickness): For direct attachment only to steel studs Item 2C) - Nominal 5/8 in. thick lead backed gypsum panel steel screws spaced 8 in. OC along vertical edges and 12 in. OC in the field when panels are applied vertically, or perpendicular to the stud when panels are applied horizontally.

S-12 steel screws, one at the top of the strip and one at the bottom of the strip. Lead discs, nominal 3/8 in. diam spaced a min of 8 in. along vertical edges of panels and 12 in. along horizontal edges of panels. Vertical joints centered over studs and staggered one stud width. For direct attachment only to steel studs Item 2C) - Nominal 5/8 in. thick lead backed gypsum panel steel screws spaced 8 in. OC at perimeter and 12 in. OC in the field.

Federal Specification QQ-L-201f, Grades "B, C or D".

RSIC-1 (2.75) clip for use with 2-23/32 in. wide furring channels.

Bearing the UL Classification Mark

UL permits the reproduction of the material contained in the Online Certification Directory subject to the constraint that the reproduced portion shall be accompanied by a statement identifying the manufacturer and the UL file number of the applicable product. The reproduced material shall be used for internal reference only and shall not be published as a substitute for the UL Environment database. Any information for any product category and any group of materials. The basic information includes specifics concerning the following:

- By publication date
- Certification dates
- Certification type
- The General Information for Through-penetration Firestop System

Through penetration Firestop Systems

Section A-A

Wall Assemblies

- "No" in the "UL Listed" column on the product listing in the UL Environment database indicates that the UL Listed mark is not for the product in question. It indicates that the product has not been UL Listed. Always look for the Mark independent of whether it is the UL Listed Mark or not.

The material used for construction of the wall should be UL Listed. If the material is not UL Listed, then the UL Listed mark is not applicable and the product in question should not be used.

Through penetration Firestop Product

- "No" in the "UL Listed" column in the UL Environment database indicates that the UL Listed mark is not applicable to the product in question. It indicates that the product has not been UL Listed. Always look for the Mark independent of whether it is the UL Listed Mark or not.

The material used for construction of the wall should be UL Listed. If the material is not UL Listed, then the UL Listed mark is not applicable and the product in question should not be used.
