

CHURCH IN THE SON MASTER PLAN - PHASE I & II

Orlando, Florida

The master plan for this dynamic Orlando church includes three phases of work. The first phase, provides the church with a new worship center of 49,000 square feet. The addition of this new campus facility connects from the existing church facility on both the first and second levels. Future phases of the project include a multi-story office building and a parking structure to support weekly activities.

The Church in the Son auditorium will seat 1200 and the plans easily accommodate the future expansion to seating for 2225. The auditorium features seating on two levels, performance quality audio/visual and lighting systems, sloped floor for premium sight lines, stage that accommodate a 100-person choir, and two baptisteries for multiple baptisms. The worship center also includes eight baptistery changing rooms, reading room, fellowship area, administrative offices and café. The two-story atrium space "Crossroads" will connect with the future office building, planned for the second phase of construction.
