

FLORIDA MUNICIPAL POWER AGENCY HEADQUARTERS

Orlando, Florida

This very modern 25,000 square foot office replaced the existing 12,000 square foot building. Located on a three-acre parcel in Orlando, Florida, just south of the Agency's current location, the two-story building is oriented to take maximum advantage of solar day lighting technologies. The facility features sunshade devices, high efficiency A/C, super-windows, large areas of open plan workspaces and heavily insulated roof and walls. A two-story clear heat lobby with bridge at second level separates the facility into two wings.
