

# FLORIDA EXTRUDERS INTERNATIONAL DISTRIBUTION & MANUFACTURING FACILITY

Sanford, Florida

The Florida Extruders project was the design-build of a 240,000 S.F. manufacturing and distribution facility for one of the nations' largest aluminum extrusion companies. The structure which is supported by over 615 tons of steel framing, houses leading edge laser equipment for the extruding, manufacturing and finishing of aluminum products. The construction of the facility and entire development of the ten-acre site was completed in 210 days.

*"Excellent commitment to safety was displayed to me today during my jobsite visit."*

-Christina Newman, FCCI
